

AMITH ANGADI

Data Analyst | SQL · Excel · Python · Dashboards

Bengaluru, India | +91 9380370095 | amithangadi14@gmail.com | linkedin.com/in/amithangadi | github.com/amithangadi

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience writing and optimizing **SQL queries** against production-style MySQL databases, combined with working knowledge of **Excel/Google Sheets** and **Power BI** for reporting and dashboarding. Comfortable translating business requirements into data-backed answers — has designed relational schemas, extracted and validated data across 30+ endpoints in live projects, and built a Python-based classification model evaluated on accuracy, precision, recall, and F1-score. Uses AI tools (ChatGPT, Copilot) deliberately to speed up query optimization and debugging. Looking to apply strong analytical thinking and SQL fundamentals to a Data Analytics Intern role solving real business problems.

TECHNICAL SKILLS

Query & Data Analysis: SQL (MySQL), Query Writing & Optimization, MySQL Workbench, Relational Schema Design

Reporting & Dashboards: Excel / Google Sheets, Power BI (basics), Report & Tracker Building

Programming: Python (data processing, model evaluation), Java (basics)

Analytical Methods: Root Cause Analysis, KPI Tracking, Model Evaluation Metrics (Accuracy, Precision, Recall, F1)

Tools & Collaboration: Git, GitHub, Postman, Agile/Scrum

AI-Assisted Workflow: ChatGPT & GitHub Copilot for query optimization and debugging

INTERNSHIP EXPERIENCE

Software Development Intern | *JSpiders, Bengaluru*

September 2025 – Present

- Write and optimize **SQL queries** in MySQL to extract, validate, and troubleshoot data across production-style applications.
- Use ChatGPT to review and rewrite slow SQL queries, improving query efficiency and turnaround time.
- Build and test structured data modules following an Agile/Scrum sprint cycle, with peer code reviews for accuracy.
- Collaborate cross-functionally via Git/GitHub — feature branches, pull requests — mirroring the cross-team workflow of business, product, and analytics teams.

PROJECTS

Comment Toxicity Detection — *Python, TensorFlow, Flask, LSTM*

- Owned the analytics pipeline end-to-end: cleaned and processed text data, trained an LSTM classifier, and evaluated performance using **accuracy, precision, recall, and F1-score**.
- Deployed the model behind a Flask API to serve real-time predictions, applying an insight-to-action mindset relevant to business analytics reporting.

Ecommerce Data & Backend Analysis — *MySQL, SQL, Spring Boot, Spring Data JPA*

- Designed the relational schema and wrote SQL queries across seven business modules — products, categories, carts, orders, reviews, wishlist, admin — supporting 20+ data endpoints.
- Owned the order and cart data flows end-to-end, validating data consistency from database through to reporting layer.
- Used SQL query optimization and ChatGPT-assisted debugging to resolve data mapping issues and improve query performance.

BookNest – Online Bookstore Data Platform — *MySQL, SQL, Spring Boot*

- Modeled and built the database schema (book catalog: name, author, category, price) in MySQL Workbench for persistent, relational storage.
- Wrote 10+ SQL-backed data endpoints, validating query outputs against expected results before handoff.

EDUCATION

BE – Computer Science and Engineering

2021 – 2025

Rao Bahadur Y Mahabaleswarappa Engineering College, Ballari, India

CERTIFICATIONS

- Full Stack Web Development – SuperMentr
- AngularJS Workshop – Kodemap
